About MIIF

The fifth edition of the Monaco International Investment Forum (MIIF) takes place in the prestigious setting of the Yacht Club de Monaco, reaffirming its position as one of the most dynamic and influential investment platforms in the European and international business landscape. Since its inception, the Forum has steadily expanded in scope, quality and global reach, bringing together investors, entrepreneurs, family offices, institutional representatives and industry leaders. Year after year, MIIF has strengthened its role as a high-level meeting point for capital allocation, strategic partnerships and cross-border collaboration. Over 300 guests per day are expected to gather at the Yacht Club de Monaco for the fifth MIIF edition.

The event is led by Founder Raffaello Cairoli together with Andrea Dini, Event Supervisor and Andrea Bogni, Relationship Manager.

Vision and Plan

MIIF's vision is driven by a strong commitment to excellence. Through meticulous workflows and rigorous due diligence, we have established ourselves as a trusted and relevant partner for businesses and individuals alike. We proudly stand as an important player in the private equity sector in the Principality of Monaco, fostering growth, innovation, and outstanding investment opportunities. Since November 2025, MIIF has also expanded to Dubai, UAE, with the first edition of MIIF Dubai hosted at the prestigious Bvlgari Yacht Club.

Our goal is not only to elevate the businesses we partner with, but also to create a network of opportunities where leading international investors can converge. Since the Forum was established in the Principality of Monaco, we have been working to expand into new destinations across strategic markets in order to offer global opportunities to our partners. At MIIF, strategic partnerships are nurtured, ambitions are realised, and potential is maximised. We open doors to a world of exclusive opportunities, setting the gold standard for investment and collaboration in two of the world's most prestigious financial hubs.
